Backend-Focused Engineer | Distributed Systems & Cloud Infrastructure | Full-Stack Delivery

EXPERIENCE

Microsoft IDC — Software Engineer II

Nov 2021 – Present

Stack: TypeScript, React, C#, Python, Kafka, CosmosDB, Azure DevOps, NoSQL

- **Built 1P Capacity Shaping Portal from the ground up** — greenfield internal platform replacing manual email/Teams' workflows; enables region managers to create shaping requests, run feasibility checks, and coordinate workload migrations across capacity-constrained Azure regions; developed end-to-end using AI-assisted development with Claude Code
- **Served as primary PoC for Azure Portal's Quota Experience** — platform serving 1M+ weekly visits and 5M+ backend requests; owned livesite triage and resolution for high-priority quota incidents
- **Delivered CSP Partner Self-Serve Quota Management end-to-end** — enabled 10,000+ CSP partners to independently manage customer quotas, cutting provisioning time from days to under 3 minutes
- **Designed and shipped Group Quota Escalation** across React portal and QMS backend, automating support ticket processing for quota requests at scale; delivered to General Availability
- **Achieved perfect GetSecureScore (GSS 700)** for Azure Portal Extension through S360 compliance, threat modeling and vulnerability management — among top services in CPlat-IDC

Athenahealth — Member of Technical Staff

Nov 2019 – Oct 2021

Stack: NodeJS, Java, C#, TypeScript, React, Jenkins, Grafana

- **Built Payment Interface Emulator** enabling full end-to-end payment workflow testing without physical device connectivity, significantly reducing QA cycle time
- **Authored comprehensive test suites** across all ADM components using MSTest, Jest, RTL and Rhino Mocks, improving coverage and product quality

Epicor Software — Technology Consultant

March 2017 – Nov 2019

Stack: C#, SOA, SQL Server

- **Implemented Epicor–SAP ERP integration** enabling real-time PO synchronisation across enterprise systems; automated Order-to-Shipping workflow reducing multi-step process to single-click execution

Harman Connected Services — Software Engineer

May 2014 – Dec 2016

Stack: C#, WPF, WinForms, SQL Server

- **Developed and maintained features** for InformCAD, a mission-critical 911 Emergency Computer-Aided Dispatch solution used by public safety agencies

SKILLS

Languages: JavaScript, TypeScript, C#, Java, Python

Frameworks & Runtime: NodeJS, ReactJS, ExpressJS

Cloud & Data: Azure, Kafka, Azure Event Hub, CosmosDB, MongoDB, Amazon S3

DevOps & Observability: Azure DevOps, Jenkins, AppVeyor, Git, Grafana, JMeter

AI-Assisted Development: Claude Code, GitHub Copilot — feature development, debugging, refactoring, and reviewing AI-generated code in production

Testing: MSTest, NUnit, Jest, RTL, Rhino Mocks

EDUCATION

B.E. Information Technology | Government Engineering College, Jabalpur (RGPV, Bhopal)

2009 – 2013
